

## Online Store Cookie Policy 2022 - 2023

### Cookies

Cookies are little files of data that are stored on your computer or handheld device.

Most websites you visit will use cookies in order to improve your user experience by enabling that website to 'remember' you, either for the duration of your visit (using a 'session cookie') or for repeat visits (using a 'persistent cookie').

Cookies do lots of different jobs, like letting you navigate between pages efficiently, storing your preferences, and generally improving your experience of a website. Cookies make the interaction between you and the website faster and easier.

If a website doesn't use cookies, it will think you are a new visitor every time you move to a new page on the site – for example, when you enter your login details and move to another page it will not recognise you and it won't be able to keep you logged in. Each cookie is unique to your web browser.

It will contain some anonymous information such as a unique identifier and the site name and some digits and numbers. It allows a website to remember things like your preferences or what's in your shopping basket.

Some people find the idea of a website storing information on their computer or mobile device a bit intrusive. Although this is generally quite harmless you may not, for example, want to see advertising that has been targeted to your interests.

If you prefer, it is possible to block some or all cookies, or even to delete cookies that have already been set; but you need to be aware that you might lose some functions of the website.

You can block cookies by going into your browser's control panel/preferences.
