HARPER ADAMS UNIVERSITY
Programme Specification

1	Awarding Institution:	Harper Adams University
2	Teaching Institution:	Askham Bryan College
3	Course Accredited by:	Not Applicable
4	Final Award and Level:	BSc / BSc (Hons) (top-up) (Level 6)
5	Interim Award(s) and Level(s):	BSc (Level 6)
6	Award Title:	Zoo Management
7	UCAS Code:	D303
8	HECoS and CAH2 Group(s):	100880 Applied Zoology 40% 100883 Marine Zoology 20% 100356 Zoology 40% CAH03-01-06
9	QAA Benchmark Statement(s):	The Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014) Agriculture, Horticulture, Forestry, Food and Consumer Sciences (2016) Business and Management (2015)
10	Language of Study:	English
11	Mode of Study:	Full-time Part-time
12	Course Duration:	See section below
13	Date Approved or Revised:	Validation Event held on 3rd May 2023 (September 2023 – August 2029

CONTEXT AND RATIONALE

The BSc/BSc (Hons) Zoo Management (top-up) programme has been designed to equip students with the knowledge and skills to enter the zoological collections industry. Areas relating to recent advances, the husbandry of captive animals, economic factors affecting the sustainability of the industry and environmental change are incorporated within this BSc/BSc (Hons) top-up programme. The programme is the specified progression route for students wishing to top-up to honours from their Management of Animal Collections with Conservation Foundation Degree award at Askham Bryan College, but students may progress to honours from other HND and Foundation Degree courses with advanced standing. Students will study the management of collections in terms of visitors, animals and infrastructure such as enclosure design. Knowledge of business principles and management skills is also developed, allowing students to work effectively at management level within a company.

Students studying the course may enter a wide variety of roles in the industry, working in animal welfare, zoo management, education, conservation and health related areas. Students may also progress to higher level study such as Masters or PhD.

Securing the Skills Needed by our Industries and Professions
- All our proposed programmes are developed following consultation with the Technical Advisory Group (TAG). With a strong practical element to the programme skills for employment are integrated to the programmes.

Working with New Technologies
- The programmes will encompass aspects of digital and innovation in teaching and learning, supported and enabled by the staff within the University Centre Askham Bryan (UCAB) Digital Skills Academy.

Turning the Climate Change Debate into Action
Askham Bryan is committed to environmental sustainability and carbon reduction and to adopting appropriate measures to support the Government's net zero emission by 2050 target as set out in the change Act of 2008 (Askham Bryan Sustainability Statement 2022-2023).

Informing Consumer Views about Food, Animal Wellbeing, and the Environment
The institution recognises that to bring about a positive change to the sustainability agenda and environmental enhancement, there is a need to look at organisational, personal and community behaviour to facilitate changes in business practices, and ensure individuals make personal decisions that support a healthy environment, for now and the future generations.

Contributing to UK Economic Prosperity
Animal health, welfare and science is an area of growth for the UK economy with a need for sustainability and self-sufficiency Askham Bryan College HE programmes contribute to this through the meaningful integration of the Education for Sustainable Development Goals. These goals are mapped to both the programmes and the modules to ensure that students are developing an applied knowledge of environmental, social, and economic sustainability which in turn contributes to the UK economic prosperity.

GENERIC AIMS

All BSc/BSc (Hons) awards aim to provide the following:

1) To develop in each student subject knowledge and understanding appropriate to individual interests and developing vocational needs.

2) To develop each student's intellectual powers, their understanding and judgement, their ability to see relationships within what they have learned and to examine the field of study in a broader perspective.

3) To develop the personal effectiveness and employability of students, in particular their ability to learn, to communicate, to work with others and to solve problems.

4) To develop those skills of professional scholarship required for career management, lifelong learning and innovation.

5) To inculcate an awareness of the wider consequences of economic activity and a determination to minimise harmful effects on the environment and on people.

6) To provide a lively, stimulating and challenging educational experience.

AWARD-SPECIFIC AIMS

The BSc/BSc (Hons) Zoo Management (top-up) award aims to provide the following:

1) To develop each student's ability to apply detailed scientific knowledge to collections management.

2) To equip students with a thorough understanding of business concepts relating to collections.

3) To equip students with the ability to identify, analyse and solve a range of commonly encountered problems within collections.

4) A knowledge of experimental, statistical and computing techniques to generate a realistic and imaginative research project using a range of knowledge from a chosen area.

GENERIC OUTCOMES

On successful completion of BSc (Hons) Zoo Management (top-up) degree awards, students will be able to:

A	Knowledge	Demonstrate a detailed and specialised knowledge of a range of theories, ideas, terminology and contexts associated with the discipline, with a clear appreciation of the ways in which knowledge is developed and the provisional nature of knowledge.
B	Problem Solve	Select, devise and evaluate the use of appropriate strategies to solve complex, unpredictable, ambiguous and real-world problems.
C	Analysis	Analyse complex data using appropriately selected techniques; draw out robust findings in this process; and thoroughly evaluate the effectiveness of the analytical strategy.
D	Synthesis	Select and combine ideas and/or data to generate meaningful and convincing composite evidence or arguments with a clear purpose.
E	Evaluation	Review complex and unpredictable information to address unpredictable, ambiguous or real-world problems, with a good awareness of the limitations of both the material under review and the analytical approach.
F	Digital Competence	Select, use and evaluate technologies to enable or enhance the performance of specific tasks, and appreciate the evolution of technology in their discipline.
G	Teamwork	Work effectively with others, with minimal or no supervision, to achieve positive outcomes; demonstrate leadership and management capabilities within a team situation; and critically assess their personal contribution to the team.
H	Career Dev	Recognise, pursue, record and reflect on personal development to pursue personal career goals and appreciate the changing nature of the workplace and the need for personal resilience and lifelong learning.
I	Communications	Communicate effectively and professionally for a range of different purposes and through different modes, with consideration of audience needs as well as other contextual factors such as commercial sensitivity, impact maximisation and accessibility requirements.
J	Practical Comp	Perform practical operations in complex, unpredictable, real-world situations that require the selection of combined or novel practical skills and critically review personal effectiveness in practical tasks with reference to relevant professional standards.
K	Autonomy	Act independently and autonomously with minimum supervision in academic and practical tasks.
L	Research	Select and use research to inform the development of knowledge and understanding, and to inform decision-making.
M	Sustain Practice	Evaluate the sustainability of practices, processes or developments, with attention to different stakeholder perspectives, unintended consequences, economic and social dimensions, or environmental considerations.
N	Global	Compare and contrast international examples or case studies that are associated with the discipline and work with an active awareness of global factors or trends that have an impact on specific areas of study.
O	Ethics	Locate a range of ethical issues associated with their own research or professional behaviours, and demonstrate personal responsibility for ethical choices, including adherence to professional codes in complex ethical dilemmas.
P	Placement	Not applicable.
Q	Honours	Effectively plan and undertake research.

AWARD-SPECIFIC OUTCOMES

On successful completion of the BSc/BSc (Hons) Zoo Management (top-up) degree award, students will be able to:

R. Critically review the recent advances within the animal industry.

S. Evaluate the basis of a range of conflicting perspectives on the management of animals.

T. Develop a critical analysis of the running of a business.

U. Critically appraise the role of zoo visitors in terms of visitor experiences, conservation education and their importance to sustaining a business.

V. Apply practical skills to a range of collection and conservation situations.

RELATIONSHIP WITH EXTERNAL REFERENCE POINT(S)

The aims and outcomes of this Honours Degree programme reflect the level descriptors for higher education qualifications, part of the QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014).

The award is reflected in the benchmark statements for Agriculture, Horticulture, Forestry, Food, Nutrition and Consumer Sciences (2019) and Biosciences (2023) as well as Earth Sciences, Environmental Sciences and Environmental Studies (2022). In addition, the themes of sustainability and globalisation are embedded.

The College holds a regular Technical Advisory Group and feedback from employers help to shape the curriculum from an industry perspective.

PROFESSIONAL ACCREDITATION ARRANGEMENTS

None.

COURSE PROGRESSION, MODULE COMPENSATION, TRANSFER, ADVANCED STANDING AND INTERIM AWARDS

Course Duration

The full-time programme will be completed in one year, with the academic year consisting of two semesters, each typically of 12 weeks duration, in addition to directed study weeks and examination periods.

The part-time programme will be completed in two years and typically be no less than 50% of the standard module diet of the full-time version of the award.

The maximum period of registration is two years beyond the expected course duration, to allow for periods of approved postponement or repeat study.

Progression

On successful completion of the programme students may be eligible to study the MSc Zoo Management and Conservation.

Module Compensation Exclusions

The following modules are not eligible for compensation within the BSc (Hons) Zoo Management (top-up) programme:

Part 1 modules: Research Project

The following modules are not eligible for compensation within the BSc Zoo Management (top-up) programme:

Part 1 modules: Sustainable Conservation Education

Transfer

BSc Top Up
For an Ordinary Degree BSc Zoo Management (top-up) candidate to progress to Honours Degree they must have completed a minimum of 80 credits after re-assessment at Level 6 and achieved a mean grade of >55%.

Entry with Advanced Standing

Table 4.1 in **Section 4** of the *Academic Quality Assurance Manual* identifies the maximum credit that can normally be advanced for students wishing to enter with advanced standing from a Harper Adams' award, or an award from another institution.

The course structure diagram(s) identify the specific study programme(s) for candidates entering with advanced standing. **Section 4.5.12** of the *Academic Quality Assurance Manual* specifies the arrangements for transfer and advanced entry and these will apply unless an alternative arrangement has been approved.

Interim Awards

The requirements for interim awards associated with final awards are as follows:

BSc Zoo Management (top-up)

The outcomes required for the ordinary award are:

A	Knowledge	Demonstrate a detailed and specialised knowledge of a range of theories, ideas, terminology and contexts associated with the discipline, with a clear appreciation of the ways in which knowledge is developed and the provisional nature of knowledge.
B	Problem Solve	Select, devise and evaluate the use of appropriate strategies to solve complex, unpredictable, ambiguous and real-world problems.
C	Analysis	Analyse complex data using appropriately selected techniques; draw out robust findings in this process; and, thoroughly evaluate the effectiveness of the analytical strategy.
D	Synthesis	Select and combine ideas and/or data to generate meaningful and convincing composite evidence or arguments with a clear purpose.
E	Evaluation	Review complex and unpredictable information to address unpredictable, ambiguous or real-world problems, with a good awareness of the limitations of both the material under review and the analytical approach.
F	Digital Competence	Select, use and evaluate technologies to enable or enhance the performance of specific tasks, and appreciate the evolution of technology in their discipline.
G	Team Work	Work effectively with others, with minimal or no supervision, to achieve positive outcomes; demonstrate leadership and management capabilities within a team situation; and, critically assess their personal contribution to the team.
H	Career Dev	Recognise, pursue, record and reflect on personal development to pursue personal career goals and appreciate the changing nature of the workplace and the need for personal resilience and **lifelong learning.**
I	Communications	Communicate effectively and professionally for a range of different purposes and through different modes, with consideration of audience needs as well as other contextual factors such as commercial sensitivity, impact maximisation and accessibility requirements.

J	Practical Comp	Perform practical operations in complex, unpredictable, real-world situations that require the selection of combined or novel practical skills and critically review personal effectiveness in practical tasks with reference to relevant professional standards.
K	Autonomy	Act independently and autonomously with minimum supervision in academic and practical tasks.
L	Research	Select and use research to inform the development of knowledge and understanding, and to inform decision-making.
M	Sustain Practice	Evaluate the sustainability of practices, processes or developments, with attention to different stakeholder perspectives, unintended consequences, economic and social dimensions, or environmental considerations.
N	Global	Compare and contrast international examples or case studies that are associated with the discipline and work with an active awareness of global factors or trends that have an impact on specific areas of study.
O	Ethics	Locate a range of ethical issues associated with their own research or professional behaviours, and demonstrate personal responsibility for ethical choices, including adherence to professional codes in complex ethical dilemmas.

The Award Specific outcomes are:

R. Critically review the recent advances within the animal industry.

S. Evaluate the basis of a range of conflicting perspectives on the management of animals.

T. Develop a critical analysis of the running of a business.

U. Critically appraise the role of zoo visitors in terms of visitor experiences, conservation education and their importance to sustaining a business.

V. Apply practical skills to a range of collection and conservation situations.

Students will have obtained a minimum of 80 credits at level 6. This will normally include a pass in the following module(s):
Enclosure Design and Stock Management
Zoo Management
Sustainable Conservation Education (elective)
Marine Conservation (elective)
Reintroduction and Restoration (elective)
Sustainable Development in the Animal Industry (elective)

Entry with Accreditation of Prior Learning (APL)/ Accreditation of Prior Experiential Learning (APEL) will be accepted in accordance with the Askham Bryan College procedure and Harper Adams University regulations. No more than ⅔ credit for the award may be derived from APL. Within this limit, no more than half of the total credit value of the award may be derived from APEL.

Holders of Foundation Degree awards will typically already have 120 credits at level 4 plus 120 credits at level 5.

Holders of a matching HND/Foundation Degree with a Merit profile (mean mark of 55% or greater) may be admitted to an honours degree programme. Those who achieve a Pass profile (mean mark of between 40-54%) may be admitted to the BSc programme.

COURSE STRUCTURE, LEVELS AND CREDIT REQUIREMENTS FOR INTERIM AND FINAL AWARDS

Harper Adams' programmes are based on a credit-accumulation system where 1 credit represents 10 notional hours of student study time. Modules are normally 15 credits or multiples thereof. Modules are also at different levels from Levels 3 – 7, according to their intellectual challenge. Courses leading to specific awards include **core modules, optional modules** from which students must select choices up to the number of credits required.

The minimum credit requirements needed to progress to interim and final awards are listed in **Section 4.4.5** of the *Academic Quality Assurance Manual*. These are reflected in the corresponding course structure study programmes, which follow.

Harper Adams University, *Academic Quality Assurance Manual*
Approved: Academic Standards Committee, October 2008
Revised: September 2019

Annex 3.02a
Page 7 of 12

Course Structure: BSc (Hons) Zoo Management (top-up)

Year 1 All at level 6 unless indicated			
CORE			
Semester 1		Semester 2	
Research Project ABC6200			40
Enclosure Design and Stock Management ABA6225			20
		Zoo Management ABA6235	20
ELECTIVES Choose two modules			
Sustainable Development in the Animal Industry ABA6233	20	Reintroduction and Restoration ABA6231	20
Sustainable Conservation Education ABA6232	20	Marine Conservation ABA6227	20

Course Structure: BSc Zoo Management (top-up)

Year 1 All at level 6 unless indicated			
CORE			
Semester 1		Semester 2	
Enclosure Design and Stock Management ABA6225			20
		Zoo Management ABA6235	20
ELECTIVES Choose two modules			
Sustainable Development in the Animal Industry ABA6233	20	Reintroduction and Restoration ABA6231	20
Sustainable Conservation Education ABA6232	20	Marine Conservation ABA6227	20

Full-time Honours students will normally study at least 120 credits (equivalent to 1200 study hours) per year from a combination of core (compulsory) and elective modules. Pass Degree students would normally study the Sustainable Conservation Education as an alternative to the Research Project.

COURSE DESIGN, LEARNING, TEACHING AND ASSESSMENT METHODS

Assessment philosophy
Assessments will vary to reflect the academic, practical and professional skills development of students on the BSc/BSc (Hons) Zoo Management (top-up) programme.

Learning and teaching methods
Teaching and learning methods used to deliver this curriculum are designed to provide experience, and, through reflection upon it, develop concepts which can then be explored through testing and experimentation. Methods vary according to the nature of each modules subject matter but include a wide diversity from more formal lectures to student centred activities including assignments, seminars, field trips, guest lectures and case studies. Students will be supported with their study via the college's virtual learning environment (VLE), which will prepare them for the autonomy expected of HE students.

Transferable skills
The programme has been developed to enable students to plan and execute research and development work. It encourages independent learning, professional and personal development, and the ability to present skills, exams and behaviour appropriate to a management career. The programme includes activities to develop core skills of communication, numeracy, IT and personal development planning as well as modules designed to develop teamwork and independent learning, problem solving and research (Research Project and Sustainable Conservation Education). Practical work experience during directed study time is also recommended so that students can apply information and skills to real life situations.

Typical assessment
Assessment is considered an important part of the learning process. Modules are assessed in one, two or three pieces of assessment. Each assessment will provide summative feedback for the learning outcomes in the module. The contribution of each assessment to the end overall mark is indicated in the module descriptors. There is no threshold requirement in any assessment component. Formative assessments methods are diverse and will not be graded.

Unless otherwise specified in module descriptors the overall mark is derived from a weighted mean, with no threshold requirement in any assessment component.
A range of subject specific assessment methodologies will be included to develop practical and technical skills. These will include professional discussion, peer observation, case studies and practical assessments.

Group assessment includes group collection of both quantitative and qualitative data and information to facilitate decision-making. Practical assessment will include the design and setup of laboratory or field experiments, with analysis and presentation of collected data. Further assessment is facilitated by case studies and links with industry, including product evaluation.

ENTRANCE REQUIREMENTS
For admission onto the Honours Degree programme, students must have achieved a minimum of a merit grade (55%) on their Foundation Degree or Higher National Diploma award. For admission onto the BSc programme, students will have successfully completed their Foundation Degree or Higher National Diploma award.

In addition, places are dependent on a reference from the student's Foundation Degree/ HND Course Manager reflecting their suitability for Level 6 study. Some applicants may be interviewed. Equivalent qualifications may be considered. Applications will be welcomed via one of the formalised pathways outlined in signed progression accords with other institutions.

The BSc (Hons) top-up route is available for both external and internal applicants and the BSc top-up route is only available as a progression route for internal Askham Bryan College students who satisfy the admissions requirements.
