75 YEARS OF EXCELLENCE IN LAND-BASED EDUCATION

Mini Guide
2024/25

Placing you at the
Heart of Yorkshire

askham-bryan.ac.uk

Degrees with us

University Centre Askham Bryan (UCAB) is the perfect place to study if your passion lies in the outdoors and land-based sectors. With our fantastic range of education facilities, industry specialist lecturers and easy access to the stunning Yorkshire countryside, your student experience will be second to none.

Faced with the opportunity of

sustaining and enhancing the rapidly changing environment we live in, the land-based sector is extremely dynamic and diverse.

Driven by constantly changing legislative, technological and consumer demands and an overall requirement for scientific research, there is a strong industry need for well trained, higher-level skilled graduates.

At UCAB, our higher education provision provides our undergraduates and postgraduates with the skills to adapt and prosper within an ever-changing industry, and to add value to the communities they live and work in.

Our strength lies with looking to the future needs of industry. The £1.7 million precision livestock facility, comprising a calf rearing facility and beef grower unit, and a teaching and learning space, the state-of-the-art equipment is being integrated into our degrees.

The facility takes a fully digitised approach to sustainable high welfare farming. Students complete research and make animal husbandry and welfare decisions based on real time data.

Complementing our commitment towards a more technological approach, our Digital Skills Academy focuses on equipping students with enhanced skills in-line with emerging digital technology industry trends.

The facilities include immersive technology such as virtual reality headsets, the use of augmented reality, as well as environmental management applications of lidar scanning.

Askham Bryan celebrates 75 years of specialist land-based education

During the last 75 years, the college has developed a regional and national reputation and significantly grown its student and staff community and course offer.

As one of the top specialist land based colleges in the UK, it has increasingly adapted to provide the qualifications and skills that land based employers need.

From welcoming its first cohort of 40 residential students in 1948, the college now educates around 4,000 students and 800 apprentices a year at sites across Northern England.

When it opened in 1948, the college offered two subjects - agriculture and horticulture. Today, the college has a broader offer including agriculture, animal science and conservation, arboriculture and forestry, engineering, equine, horticulture, motorsport, uniformed public services, sports coaching and veterinary nursing.

It has seen growth in its degree courses for undergraduates and postgraduates and received foundation degree awarding powers to add to the exciting higher education offer at University Centre Askham Bryan (UCAB), York and now expanding the Foundation Degree in Veterinary Nursing to be available in Gateshead*.

As the organisation celebrates its remarkable journey, it remains committed to engaging students in an industry relevant curriculum that enhances their skills and career prospects and meets employers' needs.

* Subject to approval

Student Life

The term 'university' can sound daunting, especially when it's a long way from home, but at UCAB, the staff are always supportive and go the extra mile to ensure you have the best education and experience whilst you are here.

UCAB offers something to suit everyone including great opportunities for students across all programmes. There are trips, activities, clubs and more!

University Centre Askham Bryan is located minutes away from the historic city of York. Recognised as one of the best places to live in the UK, York is unique and picturesque. It has excellent cycle routes, pathways, public transport and glorious countryside nearby to explore and enjoy.

York is one of the most sought-after cities in the UK to live, study, work and visit. It's a lively and unique city, situated right in the heart of Yorkshire. Big centres in the North including Leeds, Manchester, Newcastle are accessible by direct rail routes from York and London is less than a two-hour train journey.

The Student Union Team works for the entire student body with a mission to deliver an outstanding student experience. The team organises and runs fantastic events, activities and clubs as well as trips on evenings and weekends and fundraising and volunteering opportunities. The Student Union office is open to students to drop in, meet, chat or just say "hi".

On Campus

Studying and living on campus at University Centre Askham Bryan will give you the opportunity to meet new people, have fun and grow in confidence.

While the student bar is always a popular hub of activity on campus, our college is also located close to the city of York and its attractions, sporting facilities and nightlife. The College offers many opportunities to participate in different sports, clubs and

societies, community events and volunteering opportunities.

You are welcome to take part wherever your interests lie and enjoy the student experience, making new friends, and also new memories.

Student Finance

UCAB will be as supportive as possible to help you manage your finances in relation to your studies and associated subsistence costs.

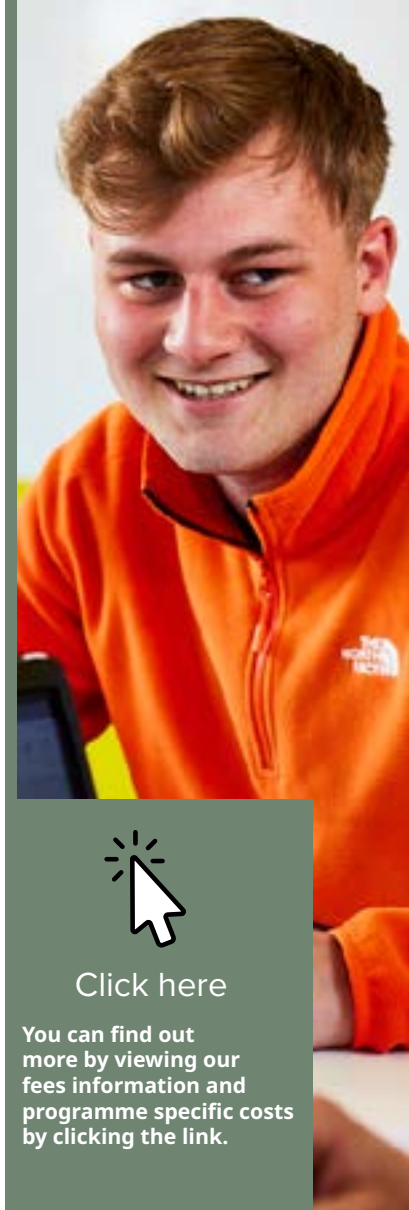

There are costs associated with studying. Details of the fees are available on our website and course level costs are highlighted on each course page online. Scan QR code below for more information.

The fees you will be charged will relate to government guidance on funding.

Our Academic Services team can support you on student loan enquiries and our Student Services department can advise on the personal finance management and our limited student hardship fund.

If in doubt about financial support, please don't hesitate to ask our Student Services Team on 01904 772277.

For more detailed information please contact Academic Services by calling 01904 772358 or by email he@askham-bryan.ac.uk

Home from Home

UCAB offers a range of on-site accommodation within our superbly landscaped grounds.

En-suite accommodation is offered on campus in a modern 63-room block and 60 rooms with recently refurbished shared bathroom facilities in the main building. There are full self-catering or half-board options with meals available for purchase in the canteen using a preloaded food card. Applications for accommodation normally open in spring.

Research and Innovation

University Centre Askham Bryan (UCAB) undertakes research and scholarly activities across the land-based sector, including: Animal Welfare, Zoo Education, Wildlife Ecology and Conservation, Equine Science, Farm Trials and Plant Science.

The research UCAB undertakes is focused on addressing the primary issue of feeding and protecting the planet, through a range of applied research studies across our curriculum. Ongoing projects utilise the excellent resources available on campus including our high welfare precision beef facility, through to our equine yard and accredited wildlife park. As well as this, we are proud of our research partnerships with external organisations, including the Yorkshire and Humber Institute of Technology and Flamingo Land Resort.

Our staff are current researchers in their disciplines, with many sitting on external committees, presenting at conferences and publishing academic articles on their research. UCAB values the contributions that students make to our research through established projects as part of their studies and wider opportunities within the organisation.

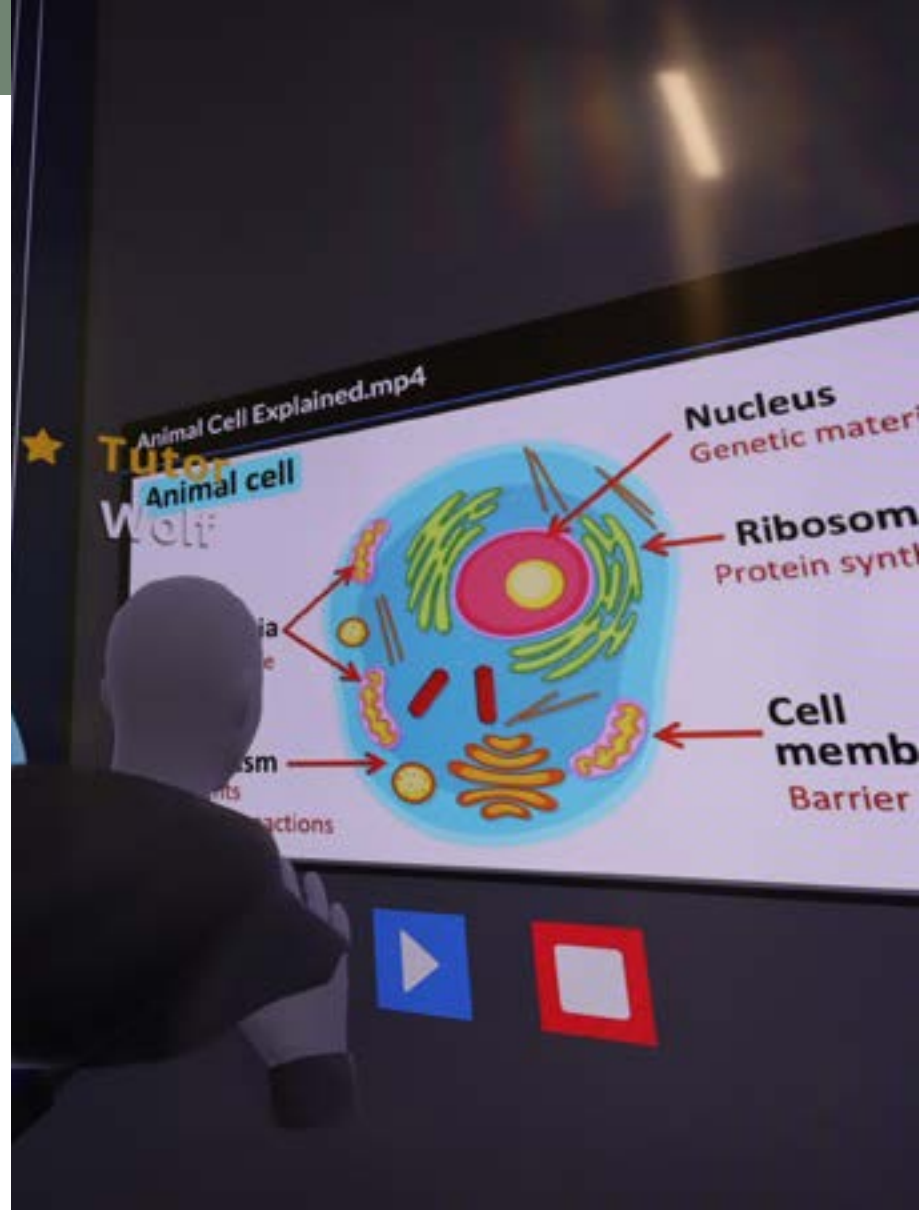

Digital and Technological Integration

We are always thinking about the future needs of industries to ensure that what we teach is relevant and useful. That's why we've invested £1.7 million in a fantastic new facility called the "precision livestock facility." This facility includes a calf rearing area, a beef grower unit, and a special space for teaching and learning, equipped with state-of-the-art equipment that will be integrated into our courses.

Our goal is to focus on sustainable and ethical farming methods. In the precision livestock facility, students get to work with cutting-edge technology. They use real-time data to make important decisions about animal husbandry and welfare. It's a hands-on experience that prepares students for the real world.

In addition to our focus on agriculture and farming, we're also committed to preparing students using digital technology. Our Digital Skills Academy is dedicated to giving students the skills they need to succeed in this fast-paced field. For example, students get to use virtual reality headsets, augmented reality tools, and lidar scanning for environmental management applications.

By combining modern farming techniques and digital skills training, we are helping students become well-rounded and ready for the challenges of tomorrow's industries.

International Trips*

Our students get great opportunities for study trips abroad to experience some amazing places such as Borneo, South Africa, Thailand, Tenerife and even sunny South Wales.

Enhanced Learning Opportunities: Educational trips provide unique learning experiences that cannot be replicated in a classroom. Students can visit historical sites, research centres, and educational institutions that offer specialised programs and resources,

deepening their understanding of various subjects and topics.

In an increasingly globalized world, having international experience is highly valued by employers. Educational trips demonstrate a student's adaptability, cross-cultural communication skills, and ability to work in diverse teams. Such experiences can provide a competitive edge in the job market and open up international career opportunities.

*Subject to additional costs

Timeline of Progression

We offer a range of programme levels, with full-time and part-time options, allowing you to choose the perfect route for your lifestyle and goals.

Level 3

Foundation Year (Level 3 equivalent)

These programmes are designed for people aged 18 or over who want to return to education and prepare students to study at degree-level.

Level 5

Foundation Degrees

These two-year degree programmes allow graduates to progress onto further study to achieve a BA or BSc degree. They are flexible, technical and employment related degrees that incorporate work-based study.

Level 6

Bachelor's Degrees

A traditional three-year degree programme. Here at UCAB, we offer these as Bachelor of Science (BSc). Where you see (Hons) you will graduate with honours, provided you meet the required academic standard needed.

Bachelor's Top Up

These programmes allow you to top up your Level 5 qualification to achieve a full bachelor's degree in one year full-time or two years part-time. You may wish to continue in the same subject or, in some cases, you can switch to another subject.

Level 7

Master's Degrees

These postgraduate courses are the highest level of study that we offer. To be eligible to study a master's degree, students must have already completed a BSc.

Our Degree Programmes

Our Higher Education degree programmes are awarded and validated by Askham Bryan College as well as by Harper Adams University (www.harper-adams.ac.uk), Royal Agricultural University (www.rau.ac.uk). Click the link for more information.

Animal Management

Animal Science offers study in academic and practical knowledge of the disciplines that relate to animal behaviour, management, science and welfare.

Our suite of programmes is designed to deliver a solid foundation in scientific, intellectual, investigative, management and husbandry skills which are all essential in the animal management industry.

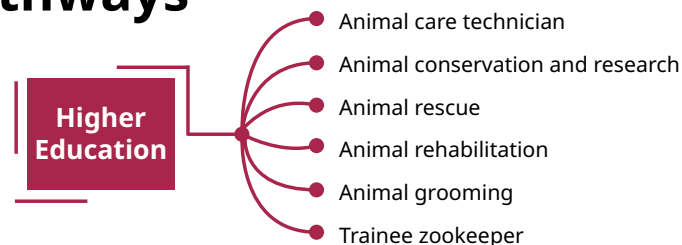

Why Choose Us?

University Centre Askham Bryan runs its Animal Science degree programmes out of our Animal Management building which is home to our Askham Bryan Wildlife and Conservation Park. Our award-winning zoo provides a centre where we care for animals and research behaviours and learn about species and their habitats.

Our facilities and partnerships allow an opportunity to learn on campus and off site. We have strong links with professionals within the animal industry and offer employer engagement activities to broaden the student experiences and understanding of different careers in the subject areas.

Equine

The Equine degree programmes involve a blend of theoretical and practical elements that will equip you with highly sought-after skills - from business and marketing, riding and coaching, to nutrition and equine health. Management concepts, practical techniques and theoretical principles are covered and prepare our equine graduates for work in the sector. They are equipped to adapt to the demands of a changing industry, its technologies, management practices, and subject research.

Did you know?

The equine industry in the UK is vibrant and valuable. It contributes £8 billion a year to the economy. With around 1 million horses, the sector has a gross output of £4.3 billion a year and is the second largest rural employer after agriculture.

Agriculture

A dynamic and diverse industry that requires sustainably-minded, business aware and technologically focused graduates.

Progressive science and developments in precision farming technology, alongside wider environmental considerations and diverse business enterprises, focus the need for the development of highly skilled, technically-competent graduates.

"The degree course has really opened my eyes to the new technologies within agriculture. We're sort of looking at an age of precision livestock farming now, particularly through the new IOT system which includes the beef unit at Askham Bryan College."

Click the link to watch the full video

Click here

Factors such as global population growth, economic and political shifts, as well as environmental change and rapid developments in technology emphasise the need for resilient and adaptive graduates in agriculture.

This is not only reflected in the growing number of graduates required, but also in the increasingly diverse range of careers available to them. Recent graduates have been offered positions as assistant farm managers, trainee consultants in crop and livestock production, trainee agronomists and trainee business consultants, while others have found employment in livestock auction markets and agricultural retail and supply businesses.

Veterinary Nursing

"My favourite part of the Veterinary Nursing programme was the Veterinary Nursing unit which simulates a veterinary environment; I enjoyed developing my practical skills there. I also really appreciated the support from staff at the College."

Chelsea, FdSc Veterinary Nursing

Registered Veterinary Nurses are sought after in a rapidly developing veterinary industry. Numerous career and personal development opportunities are offered in both the UK and overseas.

Our department team of qualified and experienced veterinary professionals provide expertise in a range of specialist disciplines, such as behaviour, practice management, exotic nursing and emergency and critical care. Through innovative and collaborative teaching, students experience a highly contextualised professional programme, including technical advice, clinical trials nursing, referral nursing, and teaching and learning development.

Pathways

Higher Education

- Head veterinary nurse
- Practice manager
- Specialist veterinary nurse
- Animal Rehabilitation (i.e. physiotherapy or hydrotherapy)
