

Welcome FdSc Management of Animal Collections with Conservation

Greetings

A quick hello from your new course manager. My name is Joseph Hargreaves-Lee and I will be your course manager throughout your journey on the FdSc in Management of Animal Collections with Conservation (we all call it MACWC).

I hope you are excited about this course! We have carefully designed a curriculum which we hope will ignite your curiosity and fuel your passion for learning a range of aspects relating to captive animal care.

Over the time of your studies you will also have the chance to go on a range of trips both within the UK and abroad, opportunities that are not to be missed!

Alongside your learning we hope that you are also excited about being able to explore and work on our onsite, BIAZA accredited, Wildlife Park! Also, don't forget that upon successful completion of you MACWC FdSc you can then do our Top-up BSc in Zoo Management

Modules

Here is an outline of the modules you will take on your MACWC Journey.

Year 1

- Academic writing and research
- Animal Anatomy and Physiology
- Practical Animal Health and Husbandry
- Human-Zoo Animal Interactions
