

BSc (Top Up) Veterinary Nursing

The BSc Veterinary Nursing programme, has been carefully considered in it's structure to allow Registered Veterinary Nurses the opportunity to develop their skills and industry knowledge to a higher level.

Each module is specifically aligned to career development for practicing nurses, whether that be a role in management or leadership within veterinary practice, refining clinical skills when working within emergency and critical care patients or educating the next generation.

Successful completion of this courses allows graduation with a Level 6 qualification, allowing future development onto higher level programmes, such as Master's degrees, as well as a certificate in Clinical Supervision to be used within practice
